Create your account

Getting started · https://rulemancer.com/blog/docs/create-account/

An account takes about a minute and does not ask for an exchange key. You can register, explore the builder, run backtests and operate paper bots with nothing but an email address.

Steps

1. Open rulemancer.com/register.
2. Enter your name, email and a password, then submit.
3. Open the verification email (subject: *Verify your email address*) and click the link.
4. You land on the dashboard on the **Free** plan.

What the free plan includes

Limit	Free
Paper bots	1
Live bots	0
Exchange connections	1
Backtests per month	5

That is enough to write a rule, backtest it and watch it run on live prices with a simulated balance. Live trading needs a paid plan and a verified trade-only key.

If the email does not arrive

Check the spam folder first, then try the reset flow on forgot password. Verification emails come from `admin@rulemancer.com`.
