Pay with crypto and get activated

Billing & plans · https://rulemancer.com/blog/docs/crypto-payments/

Subscriptions are paid in cryptocurrency to the address shown at checkout. The plan is activated by our team after the transfer is confirmed on-chain.

Steps

1. Open **Billing**, choose the plan and period, then pick a coin (BTC, ETH, SOL, TRX/USDT, ALGO or DOGE).
2. Send the USD amount of the plan, converted at the current rate, to the address on the payment page.
3. Use the stated network only — a transfer on another network cannot be recovered.
4. Paste the transaction hash (txid) into the field and submit.

Timing

Activation usually happens within a few hours of the first confirmation. You receive an email when the payment is matched and the plan is active; the order also appears in Billing with its status.

If something looks wrong

- **Wrong amount:** contact support with the txid before sending anything else.
- **Wrong network:** the funds may be unrecoverable — send the txid anyway so we can check.
- **No confirmation after a day:** open a support ticket with the txid and the order ID.

Crypto transfers are final and cannot be reversed. See the terms of service for the full policy.
