# Plans and limits

Billing & plans · https://rulemancer.com/blog/docs/plans-and-limits/

Four plans change how many bots, exchanges and backtests you can use. Nothing else in the product is gated.

## Limits

| Plan | Price | Paper bots | Live bots | Exchanges | Backtests |
|---|---|---|---|---|---|
| Free | $0 | 1 | 0 | 1 | 5 / month |
| Starter | $19 | 3 | 3 | 2 | 50 / month |
| Pro | $49 | 15 | 15 | 5 | Unlimited |
| Business | $149 | 50 | 50 | Unlimited | Unlimited |

Yearly billing applies a 20% discount. Prices are in US dollars.

## Upgrades and downgrades

An upgrade is charged for the rest of the period and applies immediately. A downgrade waits for the renewal date; bots above the new limits are paused rather than deleted.

## Usage meters

The Billing page shows current usage against each limit. When a limit is reached the builder tells you which plan lifts it, so the upgrade decision is made with the number in front of you.
